CC: Joelle Burns

I talked with Paul Lamoroux on 10/10 and he stated that he fully intended to reclaim the quarry below 5 acres this fall but had had problems with a foot injury and could not walk until it was healed and if need be to finish the project he will enlist the help of a cat operator. He stated that the machine he has at the site costs him 65/day and not using it costs him money. He stated that he will do the dirt work by November 1 and reseed after that just prior to winter. I asked if he had submitted a plan to the BLM and he stated that he had by the deadline (I have a call in with Doug Powell) Mr. Lamoroux stated had not heard back from Doug Powell regarding any deficiencies or bonding requirements.
